\*\* Print speed indicates an approximate print speed and is measured from the time a card goes into the printer to the time it ejects from the printer. Print speeds do not include encoding time or the time needed for the PC to process the image. Process time is dependent on the size of the file, CPU, amount of RAM and the amount of available resources at the point of time

### ASURE **iD**™

Includes AsureID Solo™ card printing software – ideal for entry level card design and production

### Full colour images

Direct to card dye-sublimation printing technology puts sharp, clear images directly onto the surface of the ID card.

### Relax with a 3 Year Warranty

Peace of mind comes standard on every Javelin J120i quality printer

### Load-N-Go Ribbon cartridge

Simply slide the ribbon cartridge in, close the door, and you're done. There's nothing to feed, no messy inks, nothing to tear.

### Make your cards more versatile

Optional magnetic stripe encoding module can add functionality to ID cards, for applications such as access control.

### One side or two?

Javelin J100 series printers comes in both single and double sided models. If you only need to print on one side of the card, choose the functional J110i single sided card printer. But if you require the flexibility of double sided printing, to put a barcode or other information on the back for example, choose the Javelin J120i. Either way, you are guaranteed the best click and print card printing solution available.
