

PassagePoint Kiosk

The PassagePoint Kiosk is a visitor self-registration floorstand that is optimised for high traffic or unsupervised registration areas using advanced technology.

The PassagePoint Kiosk guides visitors through finding their host, scanning their driver licence, business card or entering their name and company, taking a snapshot picture and generating a professional visitor badge - all within seconds. PassagePoint's streamlined registration process can notify you the visitor has arrived, confirm the visitor is expected, and ensure the arriving visitor is not on a list of barred visitors or companies.

PassagePoint's power and flexibility means you can tailor the registration process to meet your needs. Using the PassagePoint Kiosk at your entrance can help ensure that only the right visitors are allowed into your facility, improving guard productivity, service to your visitors and enhancing company image.
